

Search and Property listing.

MOVE-IT Property Management portal provides you a rich property search facilities.

Property search and property listings are the main key features in any property marketing website. Visitor has to be confident and comfort with how the search is working and how the properties are then listed.

In MOVE-IT property management portal, many search and navigation options are available.

Home Page:

There is a brief and smart search in the home page with innovative placement inside the graphic design of your website. Only the main search options are available. All fields values are dynamic, site administrator will have a back office to control all category types, cities, districts, and usages.

The Wizard:

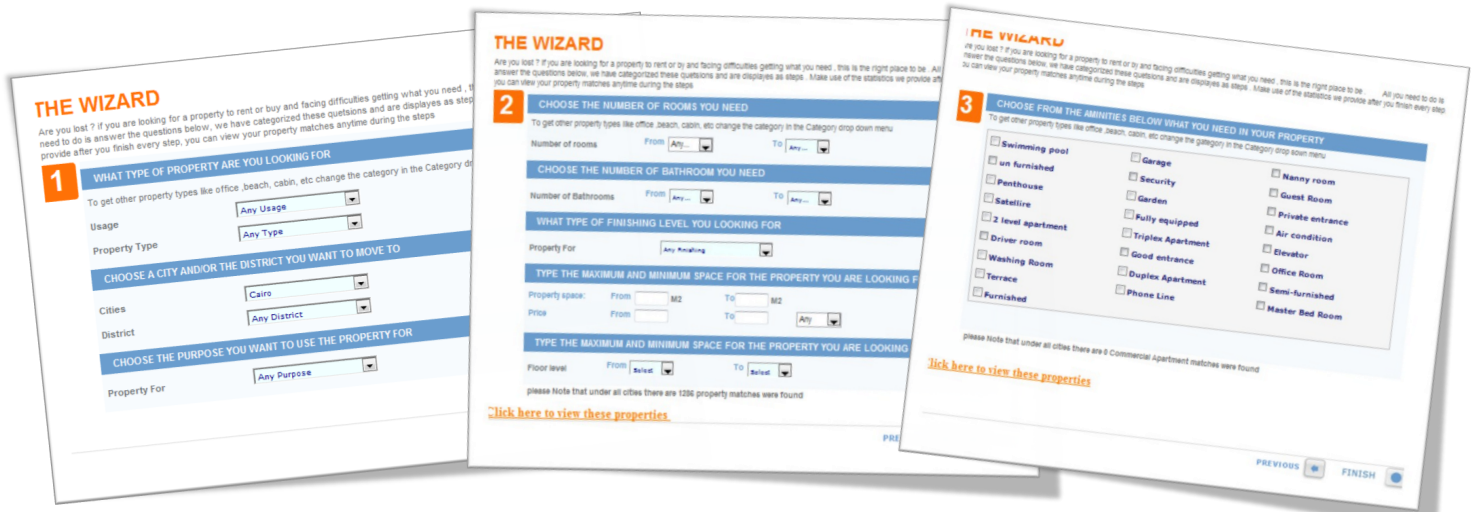

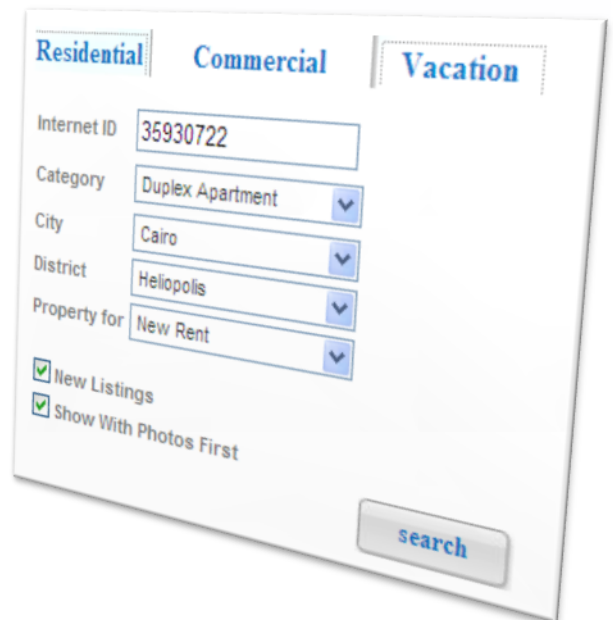

The wizard is a detailed search page. The wizard consists of three sequenced pages where you can define any option that comes to your mind.

Step 1: User defines usage, property type, city, district, property for.

Step 2: User defines Number of rooms, bathrooms, finishing, space, price range, and floor level.

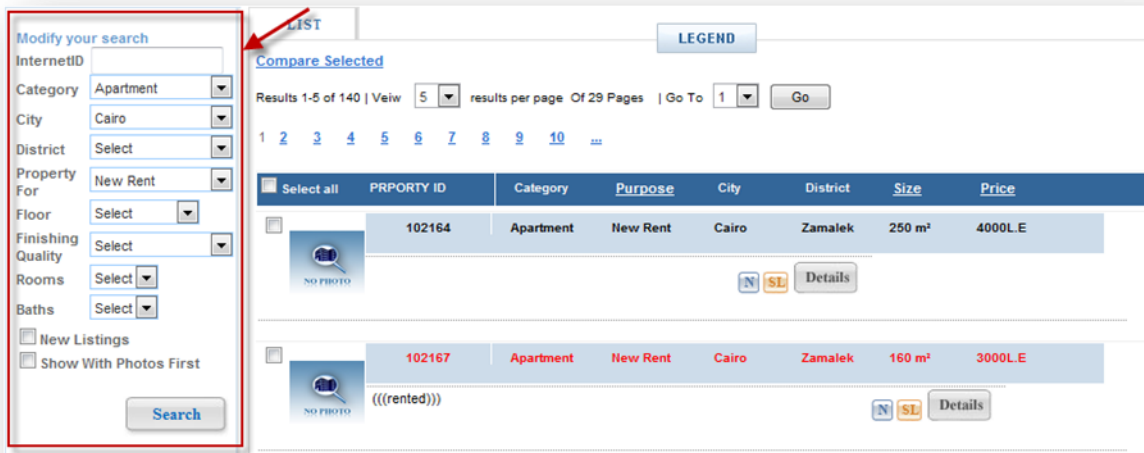

Step 3: The final step where user defines luxury options like garage, swimming pool,..etc.

All search criteria's in the wizard are dynamic (changeable) where you can define each field values from a back office interface. You can define usages, property types, cities, districts, luxury options,..etc.

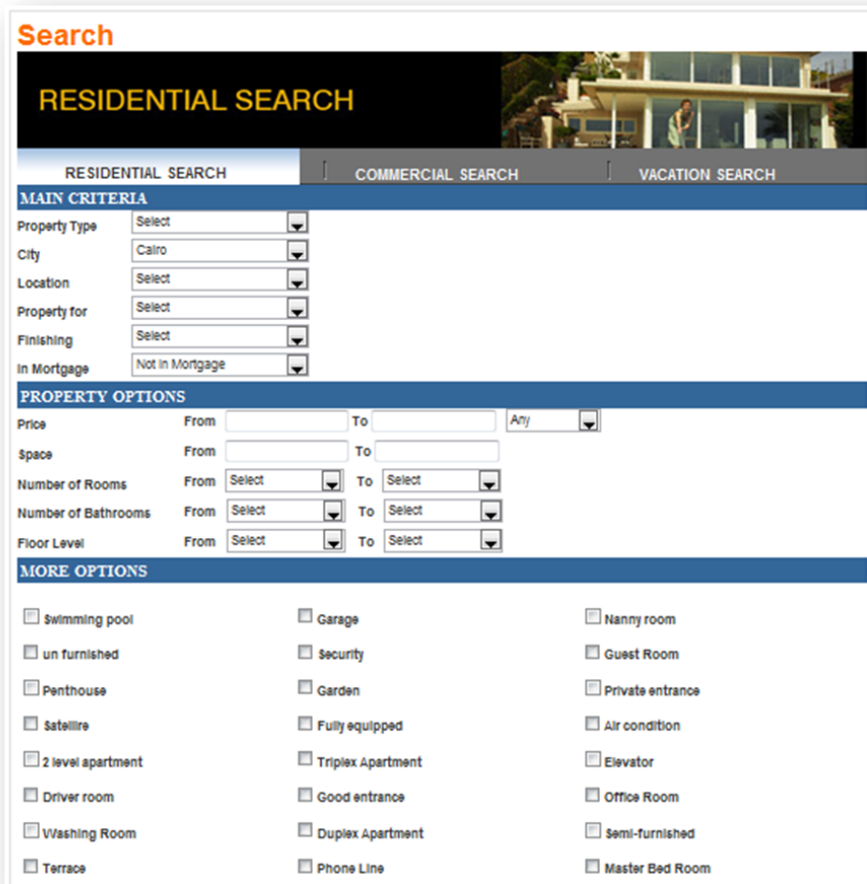

Search Tuning and refining.

After the user makes his search, a side search options are always in the left where you can tune your search to refine and narrow the results.

Detailed Search.

If users are not comfort with wizard search, they can use the detailed search page where all search criteria's are found in one page with tabular navigation between residential, commercial and vacation use.

Property Listing.

After you finish your search, properties that match your search criteria's are shown.

You can view property details, photos and even compare between multiple properties.
